1. (10 points) Look at the unit 2 homework assignments, and think of a principle used in those assignments that you need to review.
   (a) Make up and write down a problem that involves that problem.
   (b) Solve the problem.
   (c) Make a plot, plug the solution back into the equation, take a limit in which the answer is obvious, or do something similar to verify that your answer is correct.

2. (10 points) Now do the same with with unit 3.

3. (10 points) Now do the same thing with unit 4.

4. (10 points) Make sure that all of your homework, exams, and quizzes are recorded correctly online, and email Dr. Durfee if you find any errors. Then, after you do this, write “Yes, I did it” on your homework for full credit for this problem.
