*The first part of this test (Questions 1-4) is closed book. The second part (Questions 5-10) is open book. You may then use the text, your notes, and your homework (no internet or other books). Once you have opened your book you cannot go back to the closed-book part of the test. But you may look at or work on questions 5-10 during the closed book part of the test. This test is designed as a **four-hour** test, but as discussed in class, there is no real time limit except that it is due on Tuesday in class. It's up to you when you start on the open book part. Notice that all questions, short or long, are weighted equally. Use your time wisely. I give partial credit.*
